**(D)** Richten Sie das Festteil **(c)** senkrecht aus und schieben Sie das Kompensationsprofil **(b)** mit Druck an die Wand um Schrägen auszugleichen. Fixieren Sie dann mit den Wandbefestigungen **(a)**. Bei gerader Wand kann auf das Kompensationsprofil **(b)** verzichtet werden und der senkrechte Wandanschluss absilikoniert werden (Abstand Wand / Glas min. 2 mm).

**(GB)** Set up the fixed part **(c)** vertically. Push the compensation gasket **(b)** with force towards the wall to even out possible slopes. Fasten with the wall fixings **(a)**. A straight wall does not need the compensation gasket **(b)**. In this case apply silicone caulking to the vertical connection (distance wall / glass min. 2 mm).

**(I)** Porre il lato fisso **(c)** in maniera verticale, spingere poi il profilo di compensazione **(b)** con forza verso il muro, cosicché si possano compensare eventuali irregolarità. Fissare poi il tutto attraverso gli attacchi a muro **(a)**. Nel caso in cui il muro sia esattamente diritto, si può rinunciare al profilo di compensazione **(b)** siliconando direttamente il lato verticale (distanza muro / vetro al min. 2 mm).

**(F)** Positionnez la paroi étroite fixe **(c)** d'aplomb et placez la plinthe de compensation **(b)** sur le mur en poussant fortement pour égaliser les différences. Ensuite fixez la plinthe avec les vis de montage **(a)**. Avec des murs droits, il n'est pas nécessaire d'utiliser la plinthe de compensation **(b)**, on étanche avec un joint de silicon (distance mur / verre min. 2 mm).
